

12 volt Battery Pak for campers and 4WD's

- * Designed by Eureka and Fortescue Camper Trailers from 22 years of experience in the manufacture of Camper Trailers
- * Run a 40 L Engel for up to two days without the need to recharge!
- * Run LED camping lights, water pumps, laptops, and charge mobile phones for up to two weeks with no charging!
- * Includes a 105 amp/hr Deep Cycle, sealed AGM Full River quality battery
- * 10amp quality, weather resistant 3 stage CTEK charger to connect to mains power or Generator
- * Two 50 amp Anderson plugs, one mounted either side of battery to connect to car, charger or Solar Power, with extra lead supplied.
- * 3x 12v sockets to connect to lights, fridge, etc. with built fuse for protection!
- * 12v Digital Meter. Very important to monitor battery capacity to prevent your fridge from unexpectedly cutting out or damaging the electrode plates inside.
- * Temperature sensor and inline fuse to protect the battery from shorting out.
- * Can supply extra steel mounts or Lashing points to make DIY installation easy.
- * This battery will be kept to full capacity (12.7v) from charging by the car at 14 volts at approx. 4-5 hours/day driving or when connected to a 100 watt solar panel for most of the day in 100% sunlight.
